Building the Perfect Kitchen

In August of 2008, Ingram Micro hosted its 13th annual charity golf tournament at The Links at Ivey Ridge in Akron, NY. Each year, Ingram Micro selects a few local charitable/non-profit organizations to support with the proceeds from the golf tournament. Rivershore received \$42,000 from the tournament proceeds that was used to remodel the kitchen at our Creek Road residence. Since being established in 1993, our residence located on Creek Road has been home to ten adults who live with developmental disabilities. Over the years

the home's kitchen has received heavy use and is now very worn and dated. More significantly, as the residents of the home have aged and the majority now utilize wheelchairs for mobility, the nature of the environment needed in the home to support maximum independence and personal dignity has changed greatly. Simple everyday tasks such as retrieving a coffee mug from the cupboard, getting a drink of water, or preparing a snack independently have become difficult or impossible for many people in the home.

The new kitchen design is based on Universal Design, which as a general concept seeks to provide improved

usability and safety for all people in the community. The new design improves the value of the home for all involved, and creates an environment that welcomes all visitors with grace and dignity. In simple terms, this new kitchen helps people to help themselves, which is an essential foundation for a quality life.
